SUMMARY

I thrive in a knowledge-sharing environment and seek improvement throughout coding, seeking new tech, presentations. As part of a full-stack software development team, I am in no problem handling frontend and backend tech as I have been shifting from one tech to the other. Learning about and experiencing different tech is the greater tool to enrich myself and gain a wide perceptive.

EXPERIENCE

LANEX Corporation

Software Development Engineer

May 2019 - Present

- Works in a development team performing analysis, designing, implementing, and managing software programs.
- Perform Peer code review. to ensure the quality of the code and learn from each other.
- Created scripts or automating server deployments and for virtual machine setup.
- Dockerized web applications and API endpoints and deploy them in EC2 Linux server using Nginx.
- Create Page mockup to provide client a visual representation and functionality of the system.
- Support other project perform analysis and Modifying software to fix errors, improve its performance, or upgrade interfaces.
- Handled a variety of investigation requests for client providing technical solutions

CCTN Chanel 47

System admin Intern

January 2019 – April 2019

Monitor, troubleshoot and fix technical issues of the network and network equipment problems

SKILLS

JavaScript JAVA React Vue Angular Node.js
SQL NoSQL MongoDB Git HTML CSS Cloud
Docker Typescript JQuery Bootstrap Agile
GraphQL Unit Testing Flutter Dart

PORTFOLIOS

Shelf Monitoring Service

Create and maintain Mobile and Web frontend application where monitor the stock out rate of the store shelf.

Tech: Angular, AWS, Dart, Flutter

Inspection and Monitoring Basic

Maintain a web-based and responsive mobile application system that does map visualization and monitoring.

Tech: AngularJS, Java

Inspection and Monitoring - Fiber Sensing

Developed a web-based and responsive mobile application system that does map visualization and monitoring.

Tech: JavaScript, NodeJS, Typescript, Java, MongoDB, jQuery, Bootstrap, API blue print, Swagger for API documentation, Leaflet JS, Data Tables

Juwwa

Developed a Social Media Application where users can chat to the current events created by the managers and post and advertisement in chat rooms

Tech: VueJS, NodeJS

Kuroshio Trucking System

Logistics Heavy truck booking system that allows operators to book a heavy truck for operations or to subcontract.

User can also monitor and input an origin and destination

Tech: ReactJS, NodeJS, GraphQL, PostgreSQL

Shinpukan

Support for Shinpukan REST API

Analyzed, fixed, and provided support for existing REST API that computes and analyzes the building consumption like water and electrical appliances.

Tech: PHP, MySQL
